FUTURE ENGINEER
in CyberSecurity

FORMATION

2024: First year of engineering program in cybersecurity

2021-2023 : preparatory classes in ENSA Tanger

2020: 2nd bac SM-A

EXPÉRIENCES

I've built a solid foundation in web development, creating user-friendly interfaces and responsive layouts with HTML and CSS. I've also utilized my analytical skills in R to analyze data and derive actionable insights. With a passion for database management, I'm proficient in designing and querying databases effectively. Additionally, I've successfully completed Java projects demonstrating object-oriented design principles. In cybersecurity, I have basic skills in network security, as evidenced by my completion of three Cisco Certified Network Associate (CCNA) certificates: Introduction to Network, Switching, Routing, and Wireless Essentials, and Enterprise Networking, Security, and Automation. I'm eager to further develop my cybersecurity expertise and contribute to meaningful projects at your company. Collaborating with experienced professionals excites me, and I believe your innovative projects will provide invaluable real-world experience for my growth journey.
